examination was made, but made a return request.

**Witness With the Prince.**

Elia Rowlinson was the next witness. She described her first meeting with Michael at an Israelite meeting in Toronto, and her subsequent arrival at the godhouse at Detroit last December. "In the godhouse I represented temperance," she said. "The second night I was there I slept with Michael K. Mills." Miss Rowlinson also had personal knowledge of the fact that Bernice Bechel had on three occasions slept with Michael. "I heard him say Bernice was very rebellious," she said, "and that if she did not soon come to submission she would have to go to the law."

Deputy Superintendent Starkweather was next called to the witness stand. He reviewed the details of the Prince Michael trouble, and the official standpoint, but developed nothing especially new.

**Attorney's Direct Question Baled Out.**

The people then rested their case, and it was turned over to the defense. Detective Lombard was called, but his testimony contained nothing startling. Colonel Atkinson, who testified that he saw the Prince Michael in the hands of Michael Mills, but she was in Canada and could not be reached. Elia Rowlinson was recalled, and Colonel Atkinson asked her if she was a chaste girl when she went to Prince Michael's, Judge J. J. Conroy asked the question out. Emma Butler, one of the ladies, who still adheres to the principle, said she had been detained in jail several months. She said that the statement that Prince Michael had told the girls that he could be wrong was false. A statement had been given her to sign while she was in jail, but she had not signed it.

Several witnesses were called who testified to having known the prince several years ago and that his character had been good. This closed the testimony for the day. The defense announced that they would take but a few minutes tomorrow to close their case.

**BRIGHT OUTLOOK.**

**Prospects for Good Crops Throughout the State.**

**LANSING, June 15.**—The reports from northern counties indicate a favorable week for all growing crops. Farmers are getting in the corn and wheat as fast as the land dries sufficiently. Cut worms are doing considerable damage in the counties farther north. The present growing weather needs only to be continued with occasional rains to insure large crops.

In central counties the weather during the past week has been all that could be desired for crops and farm work generally. Potatoes and corn not all planted, especially on low land where the ground is not yet dried out sufficiently. Wheat and barley of full head, and coming into first bloom. Meadows and pastures heavy. Oats and barley good, and corn on high land healthy and making rapid growth. Cherries, pears, plums and apples to a certain extent are in the ground. Continued warm weather is needed for all crops.

In southern counties the past week has been generally favorable to growing crops. The low lands are yet too wet for plowing, hence there is considerable corn ground yet unplanted, while on higher land corn has in many places been cultivated. Wheat headed and looking fine, and meadows and pastures very heavy. Wheat and grass that was inclined to lodge, is reported as again standing, owing to the favorable influence of warm sunshine.

The new University Review is just out with the full Bay View announcements and indicate this year to be a notable one in the Summer university, by reason of the enlargement of the courses and the addition of a large number of instructors of high rank, from whence he was called to the head of the university was a successful stroke, for he recorded one of the most prominent figures in the educational world and will give prestige to Bay View, especially will this be true, since he has himself promptly surrounded himself with a faculty of forty-five instructors, most of whom are people of university training, who will give true university instruction of the most advanced and improved character. A single case will be that of which is Miss Shaber, selected for the Latin department, is a graduate from the University of Virginia, then studied for five years in the German university, taking the Ph. D. in Latin at Leipzig. He then taught in Indiana university, from whence he was called to the University of South Dakota. Among the new men four are taken from John Hopkins university, Prof. David Kinley for economics, Dr. Herbert W. Magone for Greek, Prof. V. B. Vos for German literature, and Prof. W. B. Shaber for chemistry. From Clark university, another post graduate institution, Prof. Lorain S. Hurlbut, a specialist in mathematics, was secured; at the University of Indiana Prof. James A. Behrends, the distinguished Brooklyn congregational divine, gives the Bible course of lectures this year. A school in methods for public school teachers has been organized, at the head of which is Miss Lella E. Partridge, one of the brightest teachers in the county in her specialty of primary methods, and Prof. Daniel Putnam of the Michigan State Normal school takes psychology and pedagogy. Associate will be Miss Emma A. Thomsen, the efficient director of music in the Detroit schools, and the noted Swedish elyod teacher, Miss Meri Topelina.

The general advance extends to the other schools. Mr. A. R. Jensen, lectures on history and literature; Prof. A. L. Loman, from Michigan State Normal school, in German and French, and Prof. T. E. Mills, from De Pau university, for physics.

As the university opens on July 12, Supl. J. M. Hall of Flint is kept busy these days sending out inquiries, answering inquiries. It is a matter for special gratification that the Review of Reviews accords to Bay View a position as second, if not the first, of similar institutions in the country.

**Ann Arbor correspondents are** burdening the wires with long and loud accounts of the trial of Prince Michael. There is a going impression that Michigan has had pretty nearly enough of Prince Michael, already.—Democrat.

The calling of the republican state convention at an earlier date than usual is a favorable rather to Mr. Fingers than to Mr. Rich; for the longer the matter is discussed, the more it becomes apparent that the wisest course for the convention to pursue will be to nominate Mr. Rich. The decision of the convention will of course and the decision of the legislature will be in favor of Mr. Rich, the longer it is continued.—Kagle.
